

BLUNIK B-CONNECT & BLUNIK EVO APP

BLUNIK EVO is an app that helps you to get rally tables from your phone camera, a PDF file, or manual input to your BLUNIK RAID device.

B-Connect links the BLUNIK EVO app with your BLUNIK device using Bluetooth BLE.

No more manual table entry — just import, check, and send to your BLUNIK RAID!

TRANSFER GUIDE

1. **Download and install the BLUNIK EVO app.**
2. **Connect your BLUNIK device to B-Connect** using the provided cable.
3. **Power ON** your BLUNIK device. (9V battery is needed)
If B-Connect is correctly connected, BLUE LED (power) will be ON.
4. **Press the button** to change B-Connect's state to **LISTEN** ●.
In this state, B-Connect is waiting for a phone with the BLUNIK EVO app to establish a connection.
5. **Open the BLUNIK EVO app.**
6. If it is the first time you use the app, or the first time you connect to a specific B-connect **allow connection permissions** when prompted.
7. If you have never linked before:

Hold the B-Connect button for 10 **seconds** until the LED flashes **red and green**.
B-Connect should be in **LISTEN mode** ●

If you were linked before, got to step 8.

8. Then press the **BLE connection icon**  on the rally/segment you want to send to your BLUNIK device.

If this is the first time your phone connects to B-Connect, it will ask for Bluetooth Linking and permissions. LINK the BLUETOOTH. Wait for few seconds

9. You should see the **Connected** icon in green in the app, and the B-Connect button will also turn **green**  (**PAIRED**)

10. Enter the correct serial number of your Blunik devices (it is shown at the starting screen of Blunik). Ex. SN0104

11. Now press the **TRANSFER** button to start the transfer.

Note: the larger the rally is, the longer the transfer will take.

Wait until a message box appears, and press OK.

If you send a rally with multiple segments your BLUNIK device will restart after each segment, don't power off, just wait until the finish message appears in the BLUNIK EVO app.

TROUBLESHOOTING

Connection issues

If you experience connection issues, especially after using different phones/users, follow these steps:

Option 1:

- Reset B-Connect by holding the button for 5 seconds until the LED flashes red and green.
- Turn off your BLUNIK device (hold *FINISH – OFF*).
- Disconnect the B-Connect cable.
- Close the BLUNIK EVO app (and make sure it's closed on other nearby phones).
- Repeat the TRANSFER GUIDE starting from step 2.

Option 2:

- Turn off the APP.
- Go to your Bluetooth settings and delete "Blunik interface"
- Repeat the TRANSFER guide.

Battery issues

If your BLUNIK RAID is running out of battery the BLUE LED (power) will shut down. Exchange the 9V battery.

We recommend Extra 9V Batteries like ENERGIZER.
