SPORT DRIVE

Accessory for Blunik

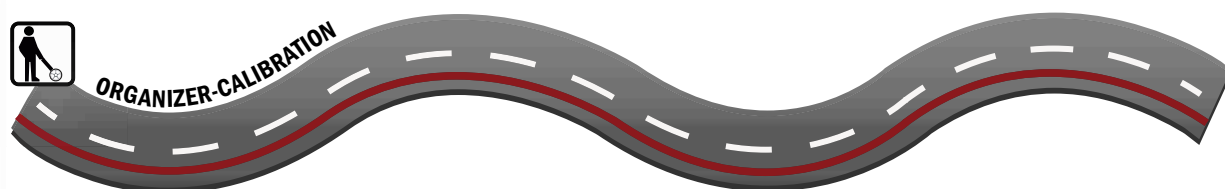

BLUNIK

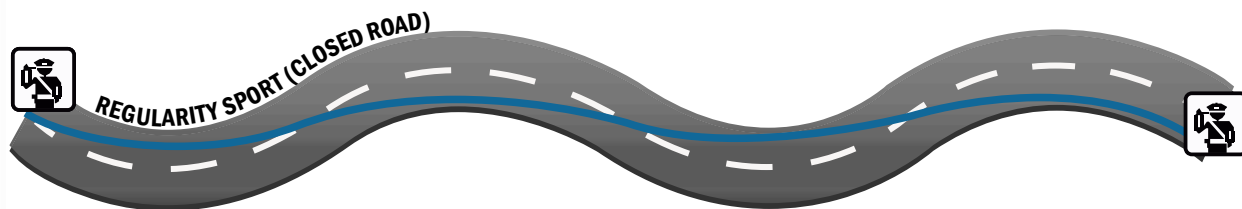

Sport drive is a special accessory for sport driving that calculates the curvatures of the trajectory and reports to the BLUNIK II the possible short cuts.

The BLUNIK II sums the distance in units modified by a percentage estimated by the driver. The percentage can be programmed for either left or right, or combined curves.

The system is very suitable for Sport Regularity (VHRS).

LS_ RS_ S 50.0
ST01 P002k500

Distance added by Blunik

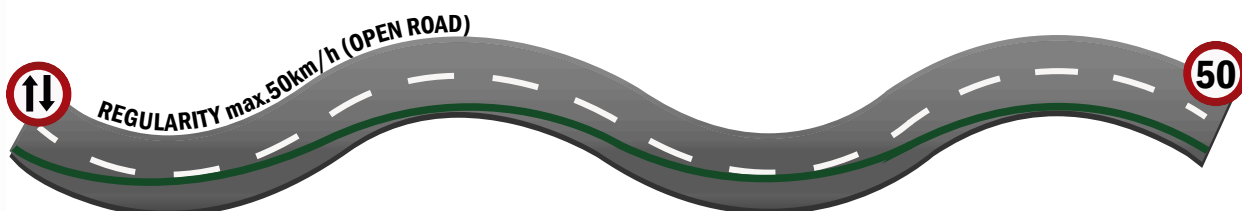

T02k500	±	60.00
-00k 001		00.00

2440 + 60 = 2500 (20%)

ACUSTIC DRIVE

Accessory for Blunik

BLUNIK

The audible interface accessory for BLUNIK II that can be programmed to produce a range of sounds at predetermined distances (according to the GAP MARKER) to follow the tables. It can produce sounds at set distances before an average change programmed. Average changes can be programmed at the same average to gather sound information related to the Road-Book. It also can be programmed to report on delays or advances into the stage (similar to BLU LED).

BLUNIK PAD

Accessory for Blunik

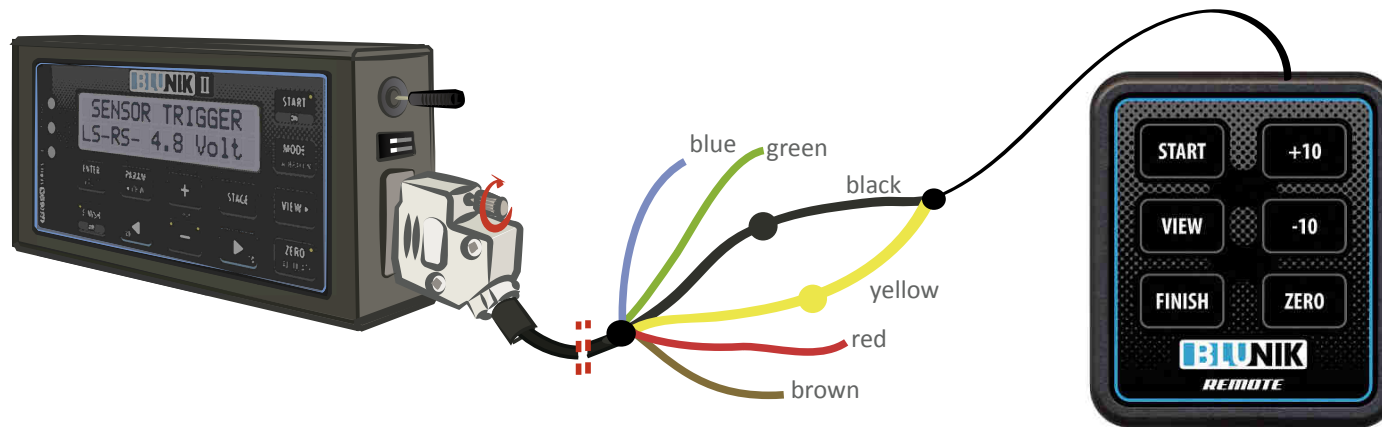

BLUNIK

Extra keypad for programming segments with Blunik II. Programme whenever you want more comfortably.

Accessory for Blunik

BLUNIK REMOTE

Extra Blunik II keypad for segment functions. Useful for navigators anchored to the bucket seat. Put it wherever you want.
